DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Claims 1-26 are directed to 4 species. The 4 species are identified as below.

Species 1 – claims 1-23 directed to **a method of controlling interference** from a transmitter in one communication system to a receiver in another communication system.

Species 2 – claim 24 directed to **a communication network** comprising at least one transmitter belonging to one communication system and at least one receiver belonging to another communication system, **wherein a beacon transmitter is associated with the at least one receiver and a beacon receiver is associated with the at least one transmitter**, whereby a power spectral density limit for transmission at any one transmitter is determined based upon the strength of the or each beacon received at the associated beacon receiver.

Species 3 – claim 25 directed to **a transmitter for a communication system**, the transmitter being provided with an associated beacon receiver, **whereby a power spectral density limit for transmission from the transmitter is determined based on the strength of one or more beacons received at the associated beacon receiver**.

Species 4 – claim 26 directed to **a receiver for a communication system**, the receiver being provided with an associated beacon transmitter, **whereby a beacon can be transmitted by the beacon transmitter to control interference, such that a desired maximum power spectral density of interference received at the receiver is satisfied**.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Art Unit: 2618

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
